

CONFIDENCE WITHOUT THE COMPLICATION

CENTURO™

CENTURO™ nitrogen stabilizer from Koch Agronomic Services is the next-generation nitrification inhibitor for anhydrous ammonia. CENTURO offers highly effective below-ground nitrogen protection and unequaled flexibility in an easy-to-handle solution.

USAGE RATE PER TON OF ANHYDROUS AMMONIA

5.0 gal

NONCORROSIVE FORMULA

This solution is 100 percent noncorrosive to UAN and anhydrous ammonia equipment, making it easier to handle so you can reduce downtime and potential damage to your equipment.

FLEXIBLE STORAGE OPTIONS

CENTURO's noncorrosive properties eliminate the need for stainless steel tanks and it will not freeze as long as temperatures remain above -9 °F (-23 °C).

DOESN'T SWELL O-RINGS

CENTURO is able to remain in pumps over time without affecting their operation. Washing or rinsing equipment between use is not usually necessary.

QUICKER FILL TIME

With fill times of five gallons per ton in less than a minute, CENTURO can potentially eliminate the need for additional inhibitor stations.

CONFIDENCE WITHOUT THE COMPLICATION.

Protect your equipment and provide better protection for your customers. Contact your distributor today to get started or visit [CENTURO.com](https://www.centuro.com) for more information.
