

CNITM SUPERCAL

CALCIUM MANNITOL SOLUTION

For Prevention and Correction of
Calcium Deficiencies In Most Crops

7-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N)	7.00%
7.00% Urea Nitrogen	
Calcium (Ca)	10.00%
Derived from: Calcium Mannitol	

Information about the components of this fertilizer material may be obtained by writing to CNI *Agriminerals* P.O. Box 3706, Albany, GA 31706, and giving the lot number which is found on the container.

Net Weight:

Jug: 29lb (13.15 kg)

Case: 58lb (26.30 kg)

Net Contents:

Jug: 2-1/2 gals (9.46 liters)

Cs 2x2-1/2: 5 gals (18.92 liters)

F1252 Bulk _____

DANGER

HAZARD: Causes severe skin burns and eye damage.

PREVENTION: Do not breathe dust/fume/gas/mist/vapors/spray.
Wash face, hands and any exposed skin thoroughly after handling.
Wear protective gloves/protective clothing/eye protection/face protection.

RESPONSE: Immediately call a POISON CENTER or doctor/physician.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.
IF ON SKIN: (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse.
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.
IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

GENERAL INFORMATION

CNI *Supercal*TM is a secondary nutrient formulated with mannitol, a sugar acid that has the ability to form multi-bond water soluble complexes with calcium and other nutrients.

CNI *Supercal*TM contains a special adjuvant that enhances penetration and translocation.

CNI *Supercal*TM is designed for use in a balanced fertility program for fruit trees, vegetables and row crops. Applied in a program of multiple applications throughout the growing season, it supplies calcium at or near the time it is need most to enhance yield and quality.

DIRECTION FOR USE

CNI *Supercal*TM is compatible with most pesticides. A jar test is always recommended. Mixing sequence: 1. water, 2. CNI *Supercal*TM, 3. pesticide and/or fertilizer. Foliar application should be made early in the morning or late in the day for best results. Follow directions as over application may result in phytotoxicity.

RECOMMENDED RATES

Optimum rate of application will vary between fields, depending on pH, organic matter content or the crop to be grown. For best results follow soil or plant analysis recommendations in consultation with a local agricultural authority. In the absence of test results, use the following guide:

Soil Application: Severe Deficiency: 4 to 6 qts. per acre; Moderate Deficiency: 2-5 qts. per acre; Maintenance: 1-2 qts per acre.

Foliar Application: Apply at the rate of 1-2 qts. per acre per application throughout the growing season for a total of 4 applications. Increase the rate or frequency if the deficiency is severe or for certain crops with a high calcium requirement. Use 20 GPA water.

Aerial Application: Apply at the rate of 1 qt. per acre in 5 gallons of water.

For flowering plants, annuals and other ornamentals, spray 2-3 fluid ounces per 1,000 sq. ft. in sufficient water to thoroughly cover the foliage and soil surface around the plants.

READ LABEL – FOLLOW DIRECTIONS!

Refer to SDS for health, safety and environmental information.

KEEP OUT OF REACH OF CHILDREN
